The Financial Stability Special Reports accompany the publication of the Financial Stability Report, providing a more detailed analysis of certain aspects and risks relevant to the stability of the Colombian financial system.

Publication Date: Wednesday, 2 of October 2024
This report analyzes several indicators to measure the concentration of credit and deposit markets in Colombia and in some peer jurisdictions (Mexico, Peru, and Chile). Additionally, recognizing that the relationship between concentration, competition, and market power is not direct, two exercises are presented to determine the degree of competition and market power of financial intermediaries in the Colombian credit market.
