AUTHORS AND/OR EDITORS

[Office of the Deputy Technical Governor](#) [Office for Monetary Operations and International Investments](#)
[Financial Stability Department](#)

The quarterly update of the Financial Stability Report for September 2025 highlights the main vulnerabilities of the local financial system in a context of stronger economic dynamism and a gradual decline in inflation.

[See the update \(only in Spanish\)](#)

Deterioration of the Local Fiscal Situation

A weaker fiscal position can increase the economy's vulnerability to external shocks and limit the scope for policy responses. This vulnerability may translate into higher risks for the financial system.

Increased Exposure to Market Risk

The intensification of trade and geopolitical tensions in various regions of the world may increase market volatility and amplify risks to the local economy and the financial system.

Increased Trade and Geopolitical Conflicts

La intensificación de las tensiones comerciales y geopolíticas en varias regiones del mundo puede

aumentar la volatilidad de los mercados y amplificar los riesgos para la economía y el sistema financiero local.
